Anyone here can verify the any of this information spreading via social media is true? I got this from my wife back in Dallas.

Sincerely,

Valmichael Leos  
Remedial Project Manager

I am passing this on from my friend living in this area, and has been alerted to this warning

### DISEASE WARNING:

I just got a call from a Southeast Texas disaster relief group (I was in direct contact with them and a few other groups assisting with rescues via phone).

They're spreading the word that the water in all areas (Beaumont, Vidor, Port Arthur, Orange, Lumberton, Bridge City, etc.) has tested positive for MRSA, Typhoid Fever, flesh eating bacteria, sewage and toxic chemicals

sewage, and toxic chemicals.

If you or anyone you know were participating in rescues, or were in the water with open wounds, and start experiencing signs of illness, get to a hospital immediately for vaccination and antibiotics. They're already getting reports of people becoming violently ill.

(Copied & Pasted)

Please share- some people won't even think about this until it's too late

(Amin plz allow. There were alot of Civilian Responders in this group.)
